

4.7 LITRE SQUARE POT

The Bato 4.7 Litre Square Pot is suitable for the cultivation and propagation of soft fruit such as strawberries. Depending on your preference, the pot can be made with either long (2,5 cm) or short legs (1 cm). It is also possible to choose for round or square drainholes or grid bottom. The Extra Light variant is suitable for single-use, whereas the Heavy and Light variants can be used multiple times over the years.

The dimensions of the pot combined with the unique draining options facilitate optimal air/water management. The pot is suitable for mechanical processing and is easy to unstack.
